## Yahoo HotJobs Reveals The #1 Recession-Proof Industry!

Healthcare is rated as the #1 Recession-Proof industry in the world, and as the "Baby Boomers" move into their latter years, this trend will only continue to rise. Forward-thinking entrepreneurs who **position themselves in front** of this "mega-wellness-trend" with the right company and product will profit despite global recessions that are happening right now around the world.

Healthcare is comprised of several segments, including hospitals, massage therapy clinics, old-age homes, pharmaceutical drugs, and many more. The largest and fastest growing market in the healthcare industry is nutrition products. 3-Time Presidential adviser and economic forecaster Paul Zane Pilzer predicts that the natural health products market will explode from \$300 million per year today, to over \$1 Trillion dollars by the end of 2012.

This trend is growing so rapidly, Paul Zane Pilzer predicts the "wellness industry" alone will create **10 million new millionaires**, and the vast majority of these new millionaires will come directly through business models similar to TriVita's new cooperative marketing model.

## Discover The #1 Market Segment Within Healthcare!...

Every year, over \$80 billion dollars are spent on pharmaceutical drugs and an estimated 80% of these "drugs" were prescribed for pain and inflammatory conditions. The #1 reason for doctors visits in North America is upper respiratory conditions like coughs, colds and asthma, but just behind the "common cold" were aches, pains and inflammation induced problems.

Pain and Inflammation are the top reasons people visit doctors offices, and it represents the lion share of money being spent within the healthcare industry. Selecting the right products - with hard science, and proven customer results will put you in the "pole-position" and stack the odds of success in your favor simply by providing a science-based solution in the "pain market".

## Profit From The World's Largest Paradigm Shift!...

There is a massive paradigm shift happening in the minds of consumers today in terms of how they are dealing with health conditions like pain. While most rely on a "pain-prescription" from their medical doctor, a growing number of people are looking for effective 100% natural alternatives that don't have negative, addictive, and unwanted side-effects.

TriVita and Nopalea are well-positioned to profit from this new wave with a brand new category-creating product that is sending shock-waves throughout the wellness industry as well as main-stream media.

## Nopalea Is Not Just Another "Juice"!...

# Cooperative Marketing Revolutionizes Home Based Business!

TriVita's Cooperative Marketing model is what sets Trivita apart from any other home based business in the world today. Through large-scale mass-media advertising campaigns using TV, Radio, Print, Direct-Mail and Internet advertising, TriVita generates thousands of new customers every single month that are then offered to Affiliate Members to purchase, acquire, and profit from on a residual monthly basis.

When you build a TriVita business, you are building a rock-solid base of customers, and the ASSET VALUE of any business is directly related to their number of customers. While most home based businesses have 90% "distributors", TriVita has set the industry upside down with 90% of their volume coming from customers not involved with the opportunity.

This asset-base, or "equity" in the marketplace has great demand, and TriVita Affiliate Members can sell or will their business whenever they choose. In fact one TriVita Affiliate Member sold their business for \$500,000 USD - this one benefit alone is truly revolutionary!

Now that you have the foundation of the industry, market, product, and business model, let's get to the good part which is how much money you can make with TriVita.
